Debasish Lenka

Senior Project Engineer - Windows Server · Active Directory · VMware
lenkadebasish977@gmail.com | +91 7894017200

I have more than 5 years of experience at Wipro as an L2 infrastructure SME, managing Windows Server, Active Directory, VMware vSphere and Azure IaaS environments at scale across multiple enterprise clients. Brings depth in automation, AD security hardening, and root-cause analysis on complex infrastructure issues.

EXPERIENCE

WIPRO | Senior Project Engineer
August 2021 – Present (5 years) | Pune, India

WINDOWS SERVER ADMINISTRATION

- Key responsible for Managing 2,000+ Windows Servers (2008–2025) across on-prem VMware vSphere, Azure IaaS, and AWS EC2 for multiple enterprise clients.
- Provided technical expertise in installation, configuration, maintenance of Windows Servers following best practices across multiple enterprise on-prem and Cloud Environments.
- Administered and provided solutions on DNS, DHCP, DFS, RDS, Print Server, and Fail-over Clustering across multiple enterprise environments.
- Resolved Azure VM boot failures including reboot loops, BCD corruption and stuck update screens using BCDEdit and offline registry hive recovery.
- Automated repetitive tasks using Power-Shell including Splunk agent roll out across 500+ VMs and bulk AD attribute update for 3,000+ users.

ACTIVE DIRECTORY ADMINISTRATION

- Administered Active Directory across multiple enterprise domains managing domain controllers, replication failures, users and groups, GPOs and AD security compliance.
- Develop and maintain Active Directory policies, computer and user based policies, and access control policies to ensure security and compliance with organization standards.
- Managed FSMO roles, domain trusts, RODC deployments, gMSA accounts across multi-site environments.
- Created trust between two domains to leverage file and print services along with other requirements from parent domain.
- Implemented GPO-based security hardening configurations (including password policies, user rights assignments, and SMB signing) to minimize attack surfaces.
- Performed regular AD security health checks and remediation using tools like Dcdiag, Repadmin, and custom scripts to eliminate replication drift and orphan metadata.
- Configured Delegation of Control at OU level, assigning granular administrative permissions to ServiceDesk and tier-1 teams without elevating domain-wide privileges reducing unnecessary privileged access across environment.
- Remediated AdminSDHolder and SDProp inconsistencies, identifying and removing stale ACLs on protected group members to eliminate persistent privilege escalation paths across the environment.
- Implemented and enforced AD auditing policies targeting critical event IDs (4624, 4740, 4728, 4768) and integrated audit logs with Microsoft Sentinel for identity threat visibility and compliance reporting.

SKILLS

WINDOWS SERVER

5+ years:
Windows Server 2008 - 2025 • DNS • DHCP • DFS • NTFS • RDS • Print Server • IIS • Failover Clustering • BCD / Boot recovery • PowerShell Scripting

ACTIVE DIRECTORY

5+ years:
Users and Groups Management • GPO Management • Sites & Services • DC Health & Replication • FSMO Management • Trust Relationships • repadmin / dcdiag • RBAC • gMSA • FGPP • Security Hardening

VMWARE & MS HYPER V

4+ years:
ESXi • vCenter (v7/v8) • vSphere • HA • DRS • vMotion • VUM / VLCM Baseline • VM Templates • Datastores • vSwitch / Port Groups • Host performance monitoring

ADDITIONAL SKILLS & TOOLS

• Patch Management: JetPatch & ManageEngine
• Monitoring and log analysis: SolarWinds, Microsoft Sentinel & Splunk
• Backup Tools: Veeam
• Linux Administration: RHEL 9.8
•Infrastructure as Code: Ansible Engine, Ansible Playbooks, Ansible-Navigator

EDUCATION

BIRLA INSTITUTE OF TECHNOLOGY & SCIENCE

MTech | Computing Systems & Infrastructure
2021-2025 | Pilani, Rajasthan
Work Integrated Learning Programme
CGPA: 7.40

RAVENSHAW UNIVERSITY

BSc | Information Technology & Management
2018-2021 | Cuttack, Odisha
Full Time
CGPA: 7.75

EXPERIENCE (CONTINUED)

VMWARE ADMINISTRATION

- Managed 50+ ESXi host vSphere v7/v8 estate maintaining high up time via HA, DRS tuning, and N-1 patch compliance.
- Created and Managed new VMs and VM templates with clone deployments, snapshots and resolved vMotion failures, HA issues, and snapshot consolidation errors.
- Performed successful VCenter Server & ESXi host upgradation from version 7.0.3 to 8.0.3 without any complexities.
- Migrated virtual switches between vSS and vDS reconfiguring port groups and uplinks with zero minimal downtime.
- Performed daily system monitoring to ensure optimal performance, diagnose and troubleshoot hardware issues with the vendor support.
- Performed host and cluster capacity planning by analyzing CPU, memory, and storage utilization trends, identifying over-committed resources and recommending right-sizing to maintain performance headroom across the vSphere estate.
- Tuned DRS aggressiveness levels and configured HA admission control policies to balance workload distribution and ensure failover capacity was always reserved across clusters.

CERTIFICATIONS

• Microsoft Certified: Azure Fundamentals (AZ-900)
• AWS Certified Cloud Practitioner (CLF-C02)
• IBM Certified Advocate - Cloud v2
• Windows Server Pro

AWARDS & RECOGNITION

BEST NGA AWARD | 2025 | Wipro, Pune

PRODIGY OF EDOH AWARD | 2024 | Wipro, Pune

CAPITAL INVESTMENT AWARD | 2023 | Wipro, Pune

TRAININGS

• Google Cloud: Generative AI Fundamentals
• Google Cloud: Text Prompt Engineering Techniques
• Microsoft: Implement disaster recovery in Windows Server on-premises and hybrid environments
• Red Hat Enterprise Linux Automation with Ansible
• AWS Certified Solutions Architect Associate
• Microsoft Certified: Azure Administrator Associate
